SECTION A - SUPPLEMENTAL INFORMATION

1. This Modification 07 to Contract DAAE07-00-D-M051/0017 is a bilateral modification.
2. The purpose of this Modification 07 to Delivery Order 0017 is to add a new requirement, as outlined in paragraphs (a) through (n) of the Scope of Work shown below:

Scope of Work for Stryker Operator IETM on R-PDA

 - a. Contractor shall provide a Stryker Operator Interactive Electronic Technical Manual (IETM) that will load, launch, and operate on the Ruggedized-Personal Digital Assistants (R-PDAs with a 512MB secure data card) fielded with the Stryker vehicles (manufactured by Talla-Tech and operating on the Pocket PC operating system). Viewer will be Microsoft Pocket Internet Explorer 2003 residing on the R-PDA. The operator IETM will have the same content as the operator portion of the Stryker 13&P IETM.
 - b. Contractor shall initially deliver an operator IETM to include all 9 currently fielded Stryker variants per CDRL A127. It is estimated that the 9 fielded variants will require 350-400M. The contractor shall incorporate other Stryker variants as that information matures/ is verified, and at the direction of the Government. With supplemental PDF's, and the inclusion of MGS, NBCRV, MC Version B, and Add-on Armor, contractor does not guarantee that all data will fit on one 512MB secure data card. If the IETM exceeds the capacity of the 512MB secure data card then, in order to save file size, the contractor will change the IETM to include only one method of displaying graphics launchable icons.
 - c. No lateral scrolling/panning left or right will be required to view the IETM on the R-PDA. The contractor is not responsible for how GFI applications or files display on the R-PDA except for the pocket guides and load plans as directed later in this scope.
 - d. Graphics and spreadsheets will be optionally viewable as "launchable icons that display the graphic/spreadsheet when activated" or as "in-line with text".
 - e. Navigation through the IETM shall be via normal Microsoft Pocket Internet Explorer 2003 navigational tools, to include instances of hyperlinks/hypertext reflective of that found in the operator portion of the Stryker 13&P IETM.
 - f. IETM shall provide a search engine that is available at all times.
 - g. The search engine will scan the text portions of the web pages (HTML files) for any of these cases:
 - 1) Any one of the words listed (case independent or case ignored)
 - 2) Any one of the words listed (case dependent)
 - 3) All words listed are treated as a phrase (case independent or case ignored)
 - 4) All words listed are treated as a phrase (case dependent)
 - h. Once the search results have been obtained, the user will be presented this information as a page listing the web pages of interest. This list (search results) will be links to the corresponding pages such that the user can select the page, view it, and return to the search results via the browser 'back' function. The search results will be limited to the first 100 pages selected and the fact that the search was terminated for count will be indicated in the search results.
 - i. The search engine will have additional limitations as follows:
 - 1) The search results will not be ranked or otherwise rearranged from the order in which they were located.
 - 2) The search engine will search the web pages in an unspecified order.
 - 3) Searches (search criteria) cannot be saved
 - 4) Search results cannot be saved
 - 5) The search engine will search for phrases in contiguous blocks of text (not across HTML tags).
 - j. The IETM will include a pop up alert that will display whenever the PMCS portion of the IETM is selected. The pop up will advise that the Digital PMCS application from PM Tactical Logistics Data Digitization (TLDD) should be used if it is available in lieu of the PMCS contained in the operator IETM. The display will require acknowledgement (selection with stylus) in order to close.
 - k. As part of this Stryker operator IETM effort the contractor shall also convert pdf files that are linked to the "operator portion only" of the Stryker 13&P IETM. These pdf files will be converted to become an integrated part of the Stryker operator IETM.
 - l. Contractor shall convert GFI Pdf files for pocket guides and load plans to HTML to meet display requirements.
 - m. Contractor shall format data for display on Microsoft Pocket Internet Explorer 2003 or newer.
 - n. Contractor shall create a simple readme document included with the operator IETM, that will load onto and be viewable from a PC and the R-PDA, that describes what the operator IETM is, what it contains, how to load it, how to use it/navigate it, to include a section advising that the Digital PMCS application from PM Tactical Logistics Data Digitization (TLDD) should be used if it is available in lieu of the PMCS contained in the operator IETM. In addition the operator IETM will contain a HTML help file with this same information that

is accessible from within the operator IETM.

3. The Government will provide the following GFE in relation to this effort:
- 1 each R-PDA: PN: 17000-2300B with Microsoft Pocket PC 2003 operating system loaded.
 - 1 each High Speed Data Cable: PN: 17057-1

4. The following hours and associated dollars will be added to this contract to cover the efforts as stated in Paragraph 2:

1,200 hours	\$84.34/hour	\$101,210.00
G&A		\$ 7,467.00
FCCM	CSSC	\$ 419.00
Fee @ 8.75%		<u>\$ 9,509.00</u>
TOTAL		\$118,605.00

5. Modification numbers 04, 05, and 06 are reserved.
6. As a result of this Modification 07, the total dollar amount under Delivery Order 0017 is increased by \$118,605.00. Except as specifically stated above, all terms and conditions of Contract DAAE07-00-D-M051/0017 remain unchanged and in full force and effect.
